

9 Helpful Tools to Build Your Online Course

PicMonkey

An incredible photo editing tool that is fun and easy to understand. One its best perks is that it's free and works in your browser. This tool provides you the ability to edit photos, create images from scratch, or make a collage with several photos. It is very user friendly and self-explanatory, no need to watch countless video tutorials on how to use this tool.

PicMonkey

Photo editing made of win.

WorkFlowy

Across the eLearning universe, this is one of the most well-received organization tools available. It gives the user the ability to outline courses, to plan course launches, to email campaigns, and the capability to collaborate with students and other teachers. This is another simple application with the most difficult decision being, “How can I take full advantage of WorkFlowy’s potential with its infinite amount of possibilities?”

Audacity

This is the most popular open source digital audio editor available. It is a free audio editor that grants basic audio editing capabilities, and is compatible across all major platforms (Windows, Apple, Linux). Record audio from almost anything, microphone, line-in, or direct through the sound card.

Dropbox

One of the simplest and most polished cloud-based storage and file-synchronization tools available. Dropbox is unmatched for its simple, hassle-free file-synchronization and sharing across multiple systems and multiple users. The mobile app is available on Android, iOS, Windows, Blackberry and Kindle Fire.

Dropbox

Vimeo

A free video share website that lets users apply filters to enhance the look of uploaded videos. They offer online tutorials, lessons, and advice on how to make and improve your videos. Vimeo makes it easy to share your video with the world or to set privacy restrictions to limit access.

<https://vimeo.com/>

The Vimeo logo is displayed in a light blue, lowercase, rounded sans-serif font. The letters are thick and have a friendly, approachable feel. The 'i' has a distinct dot, and the 'o' is a simple circle. The overall style is clean and modern.

ScreenFlow

ScreenFlow is both a motion-capture tool as well as a video editor. This app allows you to record audio and video from your computer to record slides, to create tutorial videos, and to edit the video. Once you have perfected your video, you can publish it to Vimeo or YouTube.
